

## Health and Safety (Oct 6, 2022)

TO: Entire AAMOC

AAMOC volunteers are very happy to see students in person after a long time.

Health and safety of each AAMOC member (students, parents, and volunteer) and our extended families, friends and neighbors is our collective top priority.

We, all, strive to be the best citizens and work together to build a better world. Each AAMOC family member from the youngest student to the adults, will watch for their own health & safety and care about our loved ones, our friends/neighbors/community health & safety.

Requests:

1 - Parents talk to their children about Infection Prevention and AAMOC Snack protocol with their children at home, AND, doing parenting to all students when you are at Tappan. Students are our collective children (we are a family).

2 – Teachers, please review this in your classes and have Student Teachers coach younger students.

Infection Prevention

- 1- Maintain social distance in hallways, and in the classroom as much as possible. There are more seats in all classrooms than the number of students. Please maximize your distance from others while sitting in classes
- 2- Please disinfect your seat and desk BEFORE and AFTER your class. Disinfectants and paper towels will be provided. **We owe it to Tappan students to leave the class safe when they are back on the following Monday.**
- 3- Please do NOT come to your AAMOC class if you are NOT in good health.
- 4- **We respect people who choose to wear or NOT to wear masks.**

Snack Protocol

- 1- Some students may not have enough time for eating a complete weekend breakfast before coming to AAMOC classes on Saturdays. On the other hand, a not super healthy snack may provide some satisfaction to some students and parents (who look forward to it for coming to classes).
- 2- AAMOC snack is more than nutrition, it used to be a time for socializing (students connecting to their friends).

- 3- As a result, we will continue providing snacks in a different way to be healthy and safe. We will provide packaged snacks and drinks and have students consume it in their classrooms to maintain social distance.
- 4- We would like all students and adults to help in keeping Tappan Clean. Our students from the youngest to seniors in high schools and adults always recycled and helped to remove trash out of the building in the past. Food consumption in classrooms was not allowed in the past. We would like to ask older students and parents to help in collecting all food wrapping and drink bottles/cartons and disposing them in the dumpster outside of the building.

#### Safe Driving

- 1- Please allow time for safe driving and time to walk to the classrooms so you do not have to rush/speed.
- 2- Maintain a school/parking lot speed limit near the building (5 mile per hour). We have very young siblings entering/leaving the building and we need to watch for them and others.
- 3- Park in designated areas only. Parking on the curb near the West entrance is NOT permitted. It is a fire lane, and you may get an expensive ticket. Ann Arbor Police show up randomly.
- 4- Put your car in PARK position. We had one incident where a car slipped and impacted another vehicle a few years ago.
- 5- Every adult, and each Student Teacher: **Safety is everyone's job at AAMOC.** Please watch for the safety of all, AND gently counsel/advise violators. Please take the license plate number of repeated offenders and RECKLESS drivers. We had reported one reckless driver who was not an AAMOC member to AAPS several years ago. AAPS sent a person to the building and the offender was served with appropriate consequences. **Please do not engage in argument with any offender as there are many other people who come to Tappan building for other events during our Saturday morning classes.**

**We are all committed to follow best health and safety practices  
for ourselves and for each other.**
